

Virtual Progress Monitoring with *i-Ready Assessment*

i-Ready Assessment Provides Effective Progress Monitoring during Extended School Closures

i-Ready Diagnostic and *i-Ready Growth Monitoring* are digital assessments that are hosted remotely, so students can log in from home using their own technology. For both Reading and Mathematics, *i-Ready Diagnostic* and *i-Ready Growth Monitoring* received high ratings as a valid and reliable academic progress monitoring tool by NCII.

Spring 2020 Progress Monitoring for Existing *i-Ready Assessment* Users

The *i-Ready Assessment* suite provides a single solution for both academic screening and academic progress monitoring. For academic screening, we recommend using *i-Ready Diagnostic* three times per year. For academic progress monitoring, our recommendations vary by tier, but we generally recommend using a combination of *i-Ready Diagnostic* and *i-Ready Growth Monitoring* (a shorter version of the Diagnostic that is streamlined for progress-monitoring purposes). Additional information about using *i-Ready* for screening or progress-monitoring purposes is available at CurriculumAssociates.com/Intervention.

- For existing users of *i-Ready Assessment*, Curriculum Associates has extensive guidance and support available to assist users in administering the *i-Ready Diagnostic* and *i-Ready Growth Monitoring* virtually. Both *i-Ready Diagnostic* and *i-Ready Growth Monitoring* are digital assessments that are hosted remotely, so students can log in from home using computers or iPads® that meet *i-Ready's* minimum technical requirements.
- Existing users of *i-Ready* are already being supported in the delivery of progress monitoring assessments to students during extended school closures, and they are encouraged to reach out to their *i-Ready* Account Manager for more details on the resources and support available to students who are assessing from home.

Virtual Progress Monitoring for the 2020–2021 School Year

We understand the uncertainties of the 2020–2021 school year, and we have successfully implemented access to *i-Ready* in new districts and for more than one million students when schools closed for COVID-19. If schools experience intermittent closures during the 2020–2021 school year, *i-Ready* will continue to be available to students who need academic screening or progress monitoring assessment from home. Our Professional Development teams are also available to support educators who are new to *i-Ready*.

- Existing users should contact their account managers for additional information on the support being provided for the upcoming school year.
- Districts that have not used *i-Ready* before but are interested in determining if it meets their progress monitoring needs should contact info@cainc.com.
